50X1-HUM

2

6. There are now eight naval minesweepers in the harbor,

They appear to have been brought in for the winter and are undergoing minor repairs, such as changing damaged portions and overhauling engines and boiler rooms. Some of the ships are also receiving a coat of paint. The crews appear to be partly quartered on board and partly in the barracks in the Ulmanstrasse.

50X1-HUM

The total number of fish luggers constructed in Rostock since the beginning of the building program has now reached 64. Two were finished in the reporting period. The program is now falling behind as there appear to be difficulties in getting the necessary material. The most noticeable shortages are in iron and steel plates (Blechplatten). The main shafts for the luggers are delivered from Dermark.

50X1-HUM

8. Special shipbuilding tools and instruments such as iron and steel borers, are delivered to the Neptunwerft from the Hungarian firm "Mathyas Eakosi" in Budapest.

Comment. Presumably the same as the vessel called "Eruslam" in para. 3. The correct spelling is not known.

50X1-HUM
